

RAW WATER UPDATE – May 10, 2021

Raw water storage usage will be set at .30 feet per sharing starting **May 14, 2021**, this amount will be adjusted accordingly as flow levels change.

Farmers Water Development Company hopes to run for 30 days but this will be contingent upon inflows and storage levels.

This may be the only water run for the year, please keep this in consideration when calling for water.
