

# Norwood Sanitation District

July 2024

## Public Works Report

- Mowed weeds and grass all around the lagoons
- Started treating lagoons with new product that has super bugs and oxygenates sludge to lift it up so that it's easier to break down
- We have started keeping track of wipes so that we have a gauge to determine if quantity decreases. (filling 5-gallon buckets)
- Continuing with preventative maintenance on aerators.
- The new electric panel at pioneer lift station is function great!
- I have not been in contact with the forest service but have verified that the system is installed and appears to be ready for transfer.
- We will start to resurface the outlet shed floor and repaint interior.
